Be an everyday hero!

CNG Ltd - Energy 'efficiency' challenge

Sustainable development means meeting the needs of all people now – including protecting the natural habitats that are essential to our survival – without compromising the ability of future generations to meet their own needs.

Some ideas to get you started:

Help reduce energy and water consumption:

Develop a campaign using social media, local press, posters, leaflets for display within your school or community; to advise on ways to reduce energy consumption such as -

Power down personal devices, turn off lights, unplug when you're finished, use timers to turn things on and off, keep your door closed.

You can consider developing an App to help provide a advice, also develop educational sessions or workshops to raise awareness: think about how you would deliver these and to whom?

Contact local councils, businesses and arrange to conduct a lighting survey within the local community and inform council where work needs to be carried out when lights are not working properly – see if they are using the most efficient energy source.

Leaks from water pipes – encourage reporting and raise awareness to the community of water wastage.

You and your friends can make a real difference in promoting Energy sustainability and reducing use/wastage by coming up with creative ideas and solutions as part of your Challenge.

If we all reduced a small amount of what we use each day then we could make a big difference. You'll need to find out what the issues are, then work out how you can make it a difference!

Things to think about -

If you need to raise funds to help your challenge why not hold a cake sale, or bingo morning or a sponsored event?

You could also get in touch with local parish council, council, businesses, national campaigns and charities such as Energy saving Trust, Yorkshire Water, Gas network and Electricity companies to find out how you can improve the lives of people in your community.
