Be an everyday hero!

The Shepherd Group - Conservation Challenge

Conservation is all about making a positive contribution to our environment and everything in it, from wildlife and natural resources to your community and you!

Ideas - you could:

- Build your own wildlife habitat, either in a local green space or in the grounds of a residential home for the elderly, or in a wildlife lover's garden. You can attract butterflies and bees with brightly coloured flowers or birds, bats and insects by building them a shelter from rocks and twigs.
- Make nesting boxes for birds and bats out of recycled wood.
- Design and plant a community garden in a local green space with fruit, vegetables and herbs for everyone to share.
- Design a poster to encourage people to save water by collecting rainwater or turning off the taps when they clean their teeth – that can save up to 5 litres of water per minute!
- If you need to raise money to buy your plants and materials then why not hold a sponsored walk or bike ride? You could even up-cycle old plant pots with painted designs and sell them to friends and neighbours.

If we all changed just one small thing,
then we could make a big difference!
